DETAILED ACTION

Response to Arguments

1. The Applicants' arguments and amendments filed on July 11, 2005 have been fully considered and are persuasive.

Allowable Subject Matter

2. *Claims 1-8, 10-16, and 22-24* are allowed. The claims indicated include limitations that the prior arts of record do not appear to teach or render obvious, hence they are allowed.
3. The following is an examiner's statement of reasons for allowance:

As presented in the previous office action, Leighton (US006665726B1) discloses a *replication process to provide fault tolerance for a streaming signal in a computer network that split the original signal at the root splitter into identical streams of the original signal and these are fed into plurality of leaf splitters and so on until a copy of the original signal reaches the end users* and Gai (US006032194A) reference discloses *a method and apparatus for rapidly reconfiguring a computer network following a network change and more specifically an apparatus for defining primary and back-up root devices such that the back-up becomes the new root upon failure of the primary.*

However, the prior arts of record fail to teach or suggest individually or in combination as stated in the independent claims for *"an agent to reconfigure one of said backup root splitters as a new primary root splitter responsive to detecting a problem with said*

primary root splitter, said new primary root splitter to split the data stream transmitted from the upstream server." and in combination with other limitations as set forth in the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
